Subject: Re: Requesting turn down of UUNET Peering Session to CIX Router  
X-Mailer: Mutt 0.95i

Hi Farooq,

According to my router, the session with the CIX has been admin'd down since 1 Dec 01. I have been unable to find any other sessions configured for AS1280 on our network. If you are seeing a session up somewhere, please let me know the origin ip so I can trace it from my side and clear it out. Otherwise, feel free to decom the router at your convenience. It was good working with you on this matter.

Best regards,  
Randy.
